

4 Computer Vision Projects One Can Build in Under 48 Hrs

by @tuba.captures

1. Wildlife & Bird Population Monitoring System

<https://github.com/tubakhxn/Computer-Vision-Systems>

2. Flood Monitoring & Risk Prediction System

<https://github.com/tubakhxn/Computer-Vision-Systems>

3. Pedestrian 3D Perception System

<https://github.com/tubakhxn/computer-vision-perception>

4. Real-Time 3D Dashcam Perception System

<https://github.com/tubakhxn/Real-Time-3D-Dashcam-Perception-System>

Built using:

Python • Computer Vision • Deep Learning • 3D Perception
